i have a macbook pro, and for some reason my computer froze, i have been running live from usb and i installed grub onto the usb drive. I am not able to boot from the usb drive, it says grub rescue in the boot sequence it is showing ubuntu recovery etc and i can boot into ubuntu, i just need to get my computer to boot from my usb drive, my bios is set to boot from the usb drive but it is not working
hello i am new to irc can any body help me yes how to add an user in a channel in what client? in what irc client? irc maybe /join #channelname is what you want sorry /j #channelname in terminal type /join #channelname ok if you want to type the whole line /join #channelname you need to type it like this /join #channelname where channelname is the name of the channel you want to join if you type /join #ubuntu it will take you to #ubuntu by the way please i have to download and install windows 8 that is fine if you're going to use linux you'll learn not to do stuff like that you will break your ubuntu installation it's not hard and it's not even recommended so don't do it. ok but for school work we have to use windows install windows if f3e1b3768c
