To write this book we interviewed over a hundred students about their semester grades, college classes, and coursework. We also spent many hours talking to instructors at high-level colleges, who told us what students ought to be learning in order to succeed in their classes. We then analyzed the many ways students succeed or fail in college classes, and drew conclusions from this data. From this we created a simple advice guide that is as straight forward and realistic as possible. And with it, we hope to make your college career as pleasant and as successful as possible.
