and it didn't work with my asustek product which has an ata/ide chip urbo: apt-get install vnc4server orb: Well, it's weird that you're getting that error at all. What CPU and what graphics card? huru: the live cd doesn't have openoffice orb: the package that I downloaded to install OOo has been burned and installed on the live cd orb: Check for a known bug with this chipset. mhz: if i can work through the terminal would be ok Seveas: Thanks. urbo: no, I cannot guarantee you will get a gui how do i get any dev packages for mplayer? hmmm, it gives out an error.. CppIsWeird, sudo apt-get install mplayer-* CppIsWeird, the packages are installed by default on ubuntu CppIsWeird: what do you mean by dev packages? i cant seem to get anything in here can i get some help plz ? kalifornia909, state your question or ask a question, don't just say that kalifornia909: What is your problem? kalifornia909, if you want free support, read and get libdvdcss2 and w32codecs i cant seem to get anything to work right and i cant find any ways to get it to work oh yeah urbo: it is same install as the debian one and i cant find a easy to use walkthrough kalifornia909, so read that link and get the right libraries where f3e1b3768c
