She is a professor of cell and developmental biology at the University of Tübingen. Her research focuses on the development and functions of the sensory organ system of Drosophila. She is also an adjunct professor of physiology at Harvard Medical School. Hesterberg earned a doctorate in Biology at the University of Heidelberg and became a postdoctoral fellow at the University of Heidelberg and the Max Planck Institute for Biophysical

Chemistry. She joined the faculty of the University of Tübingen in 1986 and was promoted to Professor in 1997. Hesterberg's research has been supported by the German Research Foundation, the National Institutes of Health, and the United States Army Medical Research and Materiel Command. The aim of this study was to evaluate the efficacy of mixed surgical therapy (MSST) in children with functional constipation. This study was a pilot randomized controlled trial (RCT) to evaluate the efficacy of MSST in children with functional constipation. Subjects were randomly assigned into MSST group and routine diet group, and followed-up for three months. Clinical symptoms (bowel movement frequency, constipation evaluation and abdominal pain during defecation), defecation function index (D 2d92ce491b
