BlazeVideo DVD Creator

BlazeVideo DVD Creator Crack Keygen is a lightweight application that enables you to make DVDs from a wide variety of video file formats from various sources. Interactive and stylish interface The interface is not only modern and sleek, but it is also intuitive and simple to use. The UI is composed of 4 tabs that indicate the steps you need to take to make your DVD. In case you are curious about how your project looks like before burning, you can use the player from the main window. It could be useful if the program enabled you to watch the DVD in full screen, as there is always a chance you miss out some details when previewing a video on such a small player. Intuitive and straightforward functionality The program is user-friendly and allows you to make DVDs effortlessly. After you load the videos and movies, you can add a menu, go through the settings and you can burn the DVD. Speaking of the add menu function, you should know that you have several templates to choose from and can include a background picture and music. On a side note, you can MP3 files only for the music and only a few image formats for the picture (BMP, TIFF, JPEG and PNG). Includes simplistic settings The setting available are the least impressive element of the program, as you can only specify some basic audio and video options. It would be nice if the application included some extra editing options or at least the a few default editing features, such as altering the color contrast or brightness for instance. On the other hand, the application supports both SD and HD video formats, including but not limited to RM, RMVB, DAT, MPEG, 3GP, MKV(H.264, MPEG-2 HD) or HD WMV(VC-1). In addition, it allows you to create a DVD or save your project as an ISO file. An overall good DVD creator for the average user Irrespective of whether you are putting together a holiday present from homemade clips or require more space on the drives, BlazeVideo DVD Creator can lend you a hand. I tried windows software to create DVD movies, it gave a strange cover only and had so many options. I didn't know I could

create my own cover with my own photos etc. I checked out several different programs and Blaze Video was at the top of the list. You can get a free trial of this excellent product to check it out. I am not sure why I have a bad review.
