### What's New In?

This is a free antivirus program for your computer. It has a simple interface and is easy to use. The program is capable of detecting viruses, spyware, trojans and malware. Screenshot: Review - Simply the best! Inpag Antivirus is a relatively new product by MIRADO, but it is already one of the most reliable and feature-rich products that it offers. In fact, as far as anti-malware software goes, it offers pretty much everything that you could want. It is extremely easy to use and will probably make your computer completely safe within minutes. This is a free antivirus program for your computer. It has a simple interface and is easy to use. The program is capable of detecting viruses, spyware, trojans and malware. Installation - 1. Unpack the package and run the.exe file. 2. The program will start and a new window will open, this is the Inpag Antivirus settings window. 3. In the program you will see the current status and your anti-malware license details. 4. You are good to go. Interface - The interface is simple and well-organized. There are different windows on the program interface. You have a main window and a settings window. On the main window you will see the viruses found, the scan options and the status. On the settings window, there are options to configure which antivirus to use, to check for updates, to run at system startup and to have it in the tray. There are also options to set the scan speed and to hold or delete a virus if detected. On the main window, you will see a virus infected file or an item found in your computer. If a virus is detected, it is highlighted in red and you will see the name of the virus. The virus is identified in the following ways: 1. By name 2. The method of infection 3. The description of the file 4. The type of the file (executable, system, document, data, etc.) When scanning is completed, a report will be shown with the information regarding the infection. You can click on the buttons to delete or release the item. You will have an option to scan the files of an external drive and of a CD-ROM or floppy. Additionally, the program will check the installed programs and sort the infected entries by name. When Inpag Antivirus is started, it will automatically scan your computer and will display the results of the scan in the following way: Status Remark Infected The virus is highlighted in red and you will see the name of the virus. Unsafe The program will not detect any virus. Clean There is no virus found
