the encoding method, change the server, and more. The program takes up a low-to-moderate amount of system resources and quickly performs a task (send or validate emails), without causing us any problems along the way. It also contains helpful tips in the configuration wizard, along with a well-written user documentation with snapshots. The main advantage of WorldCast is the fact that it allows you to send emails from any address (so, you don't actually have to be its owner). We definitely recommend this tool to all users.
