Download utility Fixing corrupted PDF document can be tricky and if you're not used to fixing them, you can easily miss some, some of the corrupted file is attributed to an error in the writing process. As it happens, the error occurred by accident, which means that it was a copy-paste error and as soon as you realize that your document has been corrupted you'll want to see how you can make it work again. Steps to fix To make it work, you need to follow these steps: 1. Select the corrupt PDF file and open it in any PDF software to see how it appears. In the top left, you should see a notification that informs you that the document needs to be updated. Check the options and click on it, choosing Save As as the extension to indicate that you want to replace the existing document with a new one. This is required to recover the file that was previously inaccessible. 2. Once you select Save As, the application will offer you three options: Save, Save with password and Cancel. Choose Save and select the location where you want to save the file. On the next window you can click on the password option to enter it if the file is open and the PDF is password protected. 3. Click on the OK button to complete the operation and once the process is completed, the file is now the way it should be. Now you just need to open it and read it as it was before. 4. If you're using Adobe Reader, you may be the result of a problem with corrupted font or because of a problem in the document itself, but even so, you can use a software like Adobe Acrobat Pro to repair it. If you have it, go ahead and follow the steps mentioned above and you'll see the error in no time at all. Automatic Software Updater is a software that allows you to add more software programs to your software inventory so that you can download them automatically. You can add any program you want, such as a game or a video, but you can also add software like mySoftKey. The main screen of the program allows you to select the programs you want to
