It offers a powerful PC optimization process that can significantly improve the performance and functionality of your PC. By simply making a few adjustments to your computer, it can automatically fix the problems you often face. SmartFixer will speed up your computer, clean your registry, defrag your drive, and keep your privacy intact. With its cloud support, SmartFixer provides a user-friendly web interface that offers a fast, safe, and free tool to help you quickly fix your computer. Dynamic Host Configuration Protocol (DHCP) Server: Many Windows PCs use Dynamic Host Configuration Protocol (DHCP) to serve addresses to other computers on a network. SmartFixer automatically switches DHCP on and off at the appropriate time to avoid filling up your computer with unnecessary IP addresses. The default settings will cause DHCP to be turned on for only the first few minutes after booting, so you will not have to worry about any data loss while your computer is being set up. You can also set a specific time to turn on DHCP on. Hard Drive: One of the most common problems with hard drives is fragmentation, 1d6a3396d6
