By Mennonie Samuel. Technical report by M. Samuel. Town Planning and Land Development. Also, the lack of adequate water and sewerage system currently damages and the lack of adequate stormwater drainage systems create periodic environmental problems. ISBN 978-3-8384-9632-2 Town Planning by Rangwala. pdf normal mode. I was able to download Rangwala's town planning. I insert content into the root node of xml using XDocument I am writing a unit test to create some simple xml file. Basically the xml looks like this MyLastName MyFirstName What I want to do is simply insert a value under the person element and that should be it, a simple add element. How do I go about doing this? I'm playing with XDocument which I guess is the way to go. var doc = new XDocument( new XDeclaration("1.0", "utf-8", "yes"), new XElement("person", new XElement("lastName", "MyLastName"), new XElement("firstName", "MyFirstName"))); doc.Save(@"c:\temptest.xml"); I have tried this, but it seems not to be able to create a new node under the root node. XElement listElement = doc.Element("person").Add(new XElement("lastName", "Sydney"), new XElement("firstName", "Syd")); A: I have found a way to do it. Here is the code I use var doc = new XDocument( new XDeclaration("1.0", "utf-8", "yes"), new XElement("person
