## Photoshop 2021 (Version 22.4) [Mac/Win]

Q: IF clause syntax error with google script I'm trying to do an IF statement in a Google Script, and for some reason this isn't working. The error is as follows: "SyntaxError: Unexpected identifier" Here's the code: 

```
var date = "10/16/2015"; var status = 0;
function publishToSlides() { var file = DriveApp.getFileById("fileId"); var fileName = file.getName(); file.setName(date + " (" + status + ") - " + fileName); var newFile = DriveApp.getFileById("fileId"); var slideId = "Slide" + slideNum; var slide = DocumentApp.openById(slideId).getBody().getParagraphs(); var newSlide = DocumentApp.openById(slideId).addElement(slide); var para = DocumentApp.openById(newFile.getId()).getBody().getParagraphs().get(1); var slideNum = parseInt(newFile.getId()); var filename = file.getName(); //IF statement if (status==1){ var folder = DriveApp.getFolderById("slides/folderId"); var file = folder.getFilesByName(filename); var fileName = file.next().getName(); var newFile = folder.createFile(newFile); var para = DocumentApp.openById(newFile.getId()).getBody().getParagraphs().get(1); } }
A: If you want to use conditionals or any statement inside a function it has to be inside another function. 

```
function publishToSlides() { var date = "10/16/2015"; var status = 0;
function blockOfCode(){ // Your code here if (status==1){ var folder = DriveApp.getFolderById("slides/folderId");
```

```

## What's New in the Photoshop 2021 (Version 22.4)?

Q: Merge objects in array with same key that come one after another I'm trying to merge objects in an array with a key that comes after in the array. For example if I have this: 

```
$array = [ [ 'key' => 'foo', ], [ 'key' => 'bar', ], [ 'key' => 'foobar', ], ];
```

 And then I merge the keys that come next to each other: 

```
$array = array_reduce($array, function ($array, $item) { $item['key'] = $item['key']; return array_merge($item, array_shift($array)); }, []);
```

 I should have this: 

```
$array = [ [ 'key' => 'foo', 'key' => 'bar', ], [ 'key' => 'foo', 'key' => 'foobar', ], ];
```

 I try to improve the code I use to add new keys, but I'm not really sure that it's good enough : 

```
function array_merge2($array) { $output = []; $array = array_reduce($array, function ($output, $item) { $item['key'] = $item['key']; return array_merge($output, $item, array_shift($array)); }, []); $output[] = $array; return $output; }
```

 What I'm doing is to first create an empty array, then I reduce the array to 

```
$output['key'] = $item['key'];
```

 and then merge with 

```
array_merge($output, $item, array_shift($array)).
```

 I would like to know if there is a more efficient way to do this. Thanks

---

## System Requirements For Photoshop 2021 (Version 22.4):

Minimum: OS: Processor: Memory: Graphics: Storage: Network: Recommended: Legal:  
In case of error, please e-mail us at info@rpgsample.com. We'll help you get the code,  
we just need some time to analyze the problem. Powered by the Doohicica RPG Sample  
Engine. P
